PROFESSIONAL SUMMARY

Final-year Computer Science student who has shipped production-grade AI and full-stack systems across four technical internships, achieving up to 91% model accuracy and 30% faster inference. Currently building SkillLoom, an AI-driven hiring platform for Pakistan's 15M-worker textile sector, and AI-Review Pro, a Claude API-powered code review tool. Comfortable across the full SDLC in Agile team environments.

TECHNICAL SKILLS

Languages: Python, JavaScript, C++, SQL, Assembly

Frameworks/Libraries: FastAPI, Flutter, React.js, NumPy, Pandas, Scikit-learn, TensorFlow

AI / ML: InsightFace, Computer Vision, KDE, Cosine Similarity, Claude API Integration, Generative AI

Backend & Data: RESTful APIs, PostgreSQL, Supabase, MongoDB, Database Design

DevOps & Tools: Docker, Git, GitHub, CI/CD, Postman, Agile/Scrum, OOP, Data Structures & Algorithms

EDUCATION

Bachelor of Science in Computer Science

Expected: May 2027

COMSATS University Islamabad, Wah Campus — AI, Software Engineering, Data Science, Cybersecurity

PROFESSIONAL EXPERIENCE

AI/ML & DevOps Intern | Pakistan Ordnance Factories (POF)

July 2026 – Present

- Onboarding onto AI/ML and DevOps workflows within a large-scale engineering organization, gaining exposure to production infrastructure and deployment practices in a regulated industrial environment.
- Collaborating with cross-functional engineering teams to support machine learning integration and automation initiatives.

AI & ML Engineering Intern | DevelopersHub Corporation

June 2025 – July 2025

- Awarded Best Performance recognition, ranking in the top 5% of the intern cohort for contributions across AI/ML engineering projects.
- Built and deployed ML models with Python, Scikit-learn, NumPy, and Pandas, achieving up to 91% classification accuracy on structured datasets.
- Built and optimized FastAPI endpoints to serve model predictions, cutting average inference response time by ~30%.
- Applied feature engineering and model evaluation (cross-validation, ROC-AUC) within Agile sprint workflows, collaborating via Git and daily code reviews.

Python Programming Intern | Cosmicode Technologies

July 2025 – October 2025

- Contributed to backend development using Python, FastAPI, and PostgreSQL in a 4-month Agile/Scrum engagement.
- Designed RESTful API modules with authentication, input validation, and error handling, improving system reliability.
- Optimized SQL queries and schemas, reducing query execution time by ~25% on high-frequency endpoints.

Python Programming Intern | CodeAlpha

June 2025

- Received a Letter of Recommendation for analytical skills, rapid technology adoption, and consistent technical contributions.
- Built Python automation and data-processing scripts with NumPy and Pandas, cutting manual processing time by an estimated 40%.

KEY PROJECTS

SkillLoom — AI-Powered Textile Workforce Hiring Platform

Final Year Project · Python, FastAPI, Flutter, React.js, Supabase, PostgreSQL, Docker, InsightFace

- Architected a full-stack hiring platform for Pakistan's informal textile sector, spanning 15M+ potential users, from requirements through deployment.
- Engineered AI job-matching using cosine similarity for skills ranking and the Haversine formula for location-based recommendations.
- Implemented InsightFace-based biometric verification, removing text-based login barriers for low-literacy workers.
- Built KDE-based demand heatmaps for real-time workforce planning.
- Delivered a Flutter worker app and React.js employer portal with JWT authentication and Docker-based deployment.

AI-Review Pro — Claude API-Powered Code Review Platform

React, Vite, Supabase, Claude API, Recharts

- Built and deployed an AI-assisted code review platform using React, Vite, and Supabase, with automated review generation via the Claude API.
- Implemented Recharts analytics dashboards, Supabase Realtime sync, and a tagging system, giving reviewers a persistent view of code-quality trends over time.
- Added CSV export and advanced search/filtering to streamline reviewer workflows on large codebases.

PMNH — QR-Based Mobile Museum Guide

Commissioned Client Project · Python, FastAPI, Flutter, Supabase, PostgreSQL

- Delivered an end-to-end backend for the Pakistan Museum of Natural History, digitizing visitor experience via a WiFi-gated, QR-driven mobile architecture.
- Built an admin portal enabling non-technical museum staff to manage exhibits, multimedia content, and visitor analytics independently.
- Coordinated network-level access control and APK sideload distribution with client IT, delivering Phase 1 MVP on schedule.

Additional Projects: AI-powered bone fracture detection from X-rays (Scikit-learn, image processing); normalized SQL/SSMS university management system; C++ OOP library and movie-ticket systems.

CERTIFICATIONS

- Generative AI Boot Camp — Coursera, 2024

- Python for Everybody — Coursera / University of Michigan, 2024
- Database Fundamentals (SQL & MongoDB) — Coursera / IBM, 2024
